RE: Sampling and Analysis Results/ Risk Screening PRL 400, dated April, 2004

Dear Mr. Piszkin:

EPA has reviewed the tech sheet describing sampling at Potential Release Location 400. The Navy conducted a geophysical survey to determine whether a tank had existed as well as conducted soil samples for PCBs in the vicinity of former transformers. Results indicated no evidence of a tank and no chemical results exceeding Preliminary Remediation Goals. EPA concurs with the Navy's recommendation for No Further Action for this location.

If you have questions, please call me at (415) 972-3012.

Sincerely,

A handwritten signature in cursive script, appearing to read "Nicole Moutoux".
